### DETAILED ACTION

Claims included in the prosecution are 1-20.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 7 and 12-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Thompson et al (5,277,913) of record.

Thompson et al disclose an amphiphilic phospholipid compound in which the vinyl function is attached to a hydrophilic group, liposomes containing this lipid and a method of delivery (abstract, Figures, Examples and claims). The ether is formed by the reaction of two hydroxyl group containing moieties (hydrophilic groups). Furthermore, according to instant claims, the amphiphilic lipid has an acid group which is linked to a hydrophilic group and on col. 3, line 21 et seq., Thompson teaches compounds wherein phosphoric acid groups are linked to serine moiety.

Claims 5-6 and 8-11 are allowable.
